

WCSA400

Ideal for monitoring and recording multiple cameras

WCSA400 is simply your best choice if you need to record multiple cameras over a long period of time. The video is saved in Windows Media format allowing you to view the video on every Windows PC.

Enhanced digital video recording

By utilizing our proprietary video engine and Microsoft Windows Media™ technology, WCSA400 provides the best compression but also ensures the best quality for your video. This brings you significant saving on the hard drive space.

- Auto deletes the oldest video file for you to recycle the hard disk space.
- Playback video and monitor remotely while recording video.
- You can assign each camera to a different recording folder for maximum storage.
- Supports various compression ratio that best suit your needs.
- Recording video format: Windows Media™
- Recording mode: Normal, Schedule or Motion Detection recording

High quality video for real-time streaming

If you are using WCSA400 on LAN, you can use WCSA400's Windows Media™ streaming feature to boost the remote viewing frame rate.

Search video by date or event

Simply enter date and time to search the video or search the video by event on a local or remote computer.

Motion Detection

Supports setting up multiple areas for motion detection. You can choose the following methods to have WCSA400 alert you whenever motion is detected.

- Email notification with captured images
- Play an alarm sound to deter the intruder.
- Alert you by phone

Flexible display mode

- Display mode: 1x1, 2x2, 3x3, 4x3, 4x4
- Rotates video windows if there are more cameras than available video windows on the screen.
- Hide particular camera in Kiosk mode.

Built-in web server

Enables you to view your network cameras with just one IP address.

Independent control for each camera

The camera's window size, motion detection settings, digital recording compression settings, etc., can all be customized individually.

Authentication

You can setup multiple usernames and passwords to control the web access.

Image enhancement

- Rotate the image 180 degree.
- Adjust brightness, sharpness and contrast

Monitoring from your Pocket PC

Enables you to monitor on Pocket PC.

Remote viewing

- Remote video playback
- Supports zoom to 150%, 200% and full screen.

| Features | |
|---|---|
